

BREATHTAKING MOUTHPIECE PATCHES

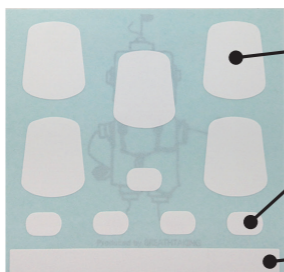

The BREATHTAKING Mouthpiece Patches can be customized to fit each unique embouchure and anatomy. By identifying the point of contact of the teeth onto the mouthpiece and building up the patch as needed, slippage can be minimized and the full benefits of the patches can be reaped for a longer period of time.

Mouthpiece Patch Details

In addition to the "Standard Patches", we have included the "Small" and "Long" patches. Cut the "long" patch to your liking and set it on the mouthpiece.

Standard Patch

Small Patch

Long Patch

Mouthpiece Patch Usage Guide

Place the "Small Patch" over where your teeth contact the mouthpiece.

Place the "Standard Patch" over the "Small Patch" on the mouthpiece.

A Note on Customizing

After placing the "Small Patch" over the mouthpiece, place the cut strip(s) of the "Long Patch" on either side, dependent on your unique bite, anatomy and embouchure (cut off corners for added resistance to peeling).

Place the "Standard Patch" on the mouthpiece over the customized patch placement when finished.

⚠ Caution

- Place the "Standard Patch" over the "Small Patch" (when reversed, the patches will peel off easier).
- Please remove any residue, moisture or oils from the mouthpiece before adhering the patches.
- You can ensure stronger adhesion of the patches to the mouthpiece by pressing down on the patches with a rounded object/surface.

This is a consumable item. Should there be any appearance of holes or developments of slippage from constant contact with the teeth or any other perceived changes during usage, replacement is recommended for continued use at the optimal state. Should you develop any irritation or itching from the use of the product, please stop use immediately and consult with a medical professional. Accidental swallowing of the product may cause dangerous blockage in the throat. Please advise caution during usage.

Please keep away from the reach of children.

We cannot accept responsibility for any irritation or accident(s) that may result from the use of the product.
